

## **September Update**

With the school year in full swing, I have been occupying much of my time working on my classes. But as a member of the CRRC there is always plenty to do. This past month I have spoken with the centers advisory board and Coast guard: Sector Northern New England about the PAH toxicity manual on which I have been working. Also, I participated in the CRRC's Modeling workshop last month. As my research exchange with Cedre approaches, I am getting ready for my work through background literature studies.
